

Name: \_\_\_\_\_

Read    Draw and Label    Solve    Sentence    Explain

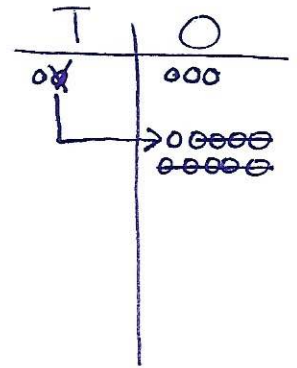

Katrina has 23 stickers, and Jennifer has 9. How many more stickers does Jennifer need to have as many as Katrina?

Draw and Label

Solve

$$\begin{array}{r} 1 \\ \cancel{2}3 \\ - 9 \\ \hline 14 \end{array}$$

Write a Sentence

Jennifer needs 14 more stickers to have the same number as Katrina.

Explain Your Process

First I labeled a drawing. That helped me to see that I needed to find the missing part. I subtracted  $23 - 9$ . I needed to unbundle a ten. I checked my work with a place value chart.
