

Reason abstractly and quantitatively.

Mathematical Practice 2

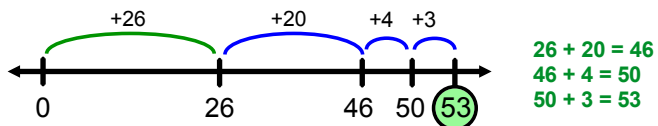

I can use numbers and words to help me make sense of problems.

Numbers to Words

$$26 + 27 = 53$$

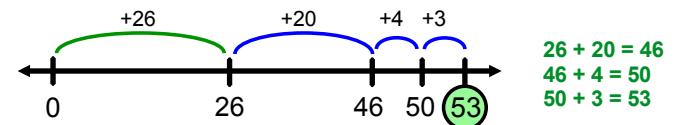

There are 26 boys and 27 girls on the playground.
How many children are on the playground?

Words to Numbers

There are 26 boys and 27 girls on the playground.
How many children are on the playground?

$$26 + 27 = 53$$
